

MS25, MST25, MS20, MST20

- Versions:
 - MS25 – with thermal and magnetic releases
 - MST25 – with a thermal release
 - MS20 - with thermal and magnetic releases for single-phase consumers
 - MST20 – with a thermal overload release for single phase consumers
 - Manual control:
 - START, STOP, push-buttons
 - Test of release function (TEST)
 - Automatic switch-off with thermal or magnetic release
 - Control with under-voltage release or shunt release
 - An auxiliary switch for side mounting or flush mounting used for indicating the switching state
 - ON/OFF, push-buttons position unequivocally indicates the switching position of main circuit contacts
- Contact material:
 - Resistant to contact weld
 - Enables low contact heating
 - Isolating distance between contacts: 4.5 mm per contact place
 - Connection of a rigid or flexible conductor
 - Assembly to 35 mm wide mounting rail in accordance with EN 60715 or fixing with two screws
 - Vertical or horizontal operation position

ENCLOSURES

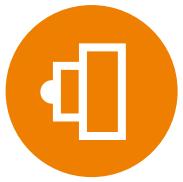

Enclosure IP41/55
O-41/55
Front plate IP41/55
CP-41/55

MS25 or MST25 with all accessories can be built into an enclosure or a front plate.

Emergency stop push-button NAT. It is also available with a key-lock.

MS25, MST25, MS20, MST20

Padlocking feature Z

Push-button diaphragm M

The manufacturer also supplies an enclosure and a front plate with degree of protection IP55 (O-55, CP-55); in this case the diaphragm is already mounted. However, it should be removed if a padlocking feature or an emergency stop bush-button is built-in.

Neutral link NL

One N/PE neutral link is usually built in the enclosure O-41/55 or CP-41/55. A place for an additional neutral link is also available.
